

LMDS — End-to-End Simulation & Pre-Deploy Master Audit

Repository: github.com/Siriwat08/phaopanya-scg | Branch: main | Commit: latest | Date: 2026-07-08 | Auditor: LMDS Supreme Architect (Dry-Run Mode)

Executive Summary

LMDS (Dry-Run Simulation) Google Sheets Custom Menu (Frontend), WebApp Interface (HTML/JS) Backend (Google Apps Script) Production 3: (1) Custom Menu Execution & LockService audit, (2) WebApp Interface & Client-Server Communication, (3) Output Validation & Go/No-Go Decision.

src/ (22 .gs + 12 HTML) 37 Event Listeners WebApp 18 Backend google.script.run 11 LockService 8 Concurrent Modification onEdit trigger Q_REVIEW submitReviewDecision WebApp duplicate FACT_DELIVERY rows race condition.

78% — Single-User / Low-Volume scenario Multi-User Production BUGHUNT 19 (5 Critical, 8 High, 4 Medium, 2 Low) 3

1. Google Sheets Custom Menu Execution

onOpen() src/0_core_system/00_App.gs 64-152 Custom Menu inline chaining (ui.createMenu().addItem().addSubMenu().addToUi()) helper function 4: Top-Level (2), Group 1 — & Master (9), Group 2 — SCG (4), & (22) 37 binding 28 runFullPipeline binding 2.

1.1 Custom Menu Mapping (37)

	Menu Item	Target Function	LockService	Risk
Top	Run Full Pipeline	runFullPipeline	tryLock(3000ms)	MEDIUM
Top	Apply Master Coordinates To Daily Job	applyMasterCoordinatesToDailyJob	PropertiesService flag	HIGH
G1	Full Pipeline ()	runFullPipeline	tryLock(3000ms)	MEDIUM
G1	Step 1 — Load Source	runLoadSource	× (placeholder)	LOW
G1	Step 2 — Normalize	runNormalize	× (placeholder)	INFO
G1	Step 3 — Match Engine	runMatchEngine	tryLock(10000ms)	LOW
G1	[V6] Pipeline (Emergency Stop)	requestPipelineStop_UI	×	MEDIUM
G1	[V6] Stop Signal	clearPipelineStopSignal_UI	×	LOW

Sys [PH2] Version Info	showVersionInfo	× [PH2] (display only)	INFO

1.2 Dry-Run Simulation [PH2] (End-to-End)

1.2.1 runFullPipeline() — Top-Level / G1

Flow: [PH2] → onOpen menu binding → **LockService.getScriptLock().tryLock(3000)** → [PH2] lock → **safeUiAlert_()** (△ busy) [PH2] return → [PH2] lock → **invalidateAllGlobalCaches()** → **safeRun(runLoadSource → runNormalize → runMatchEngine)** → **getPipelineDiagnosticSummary_()** → **safeUiAlert_()** (□ [PH2]) → finally: **lock.releaseLock() + flushLogBuffer_()**

Expected Outcome (Success):

- Sheet **Source**: SYNC_STATUS = SUCCESS [PH2]
- Sheet **M_PERSON** / **M_PLACE** / **M_ALIAS** / **M_DESTINATION**: [PH2] updated
- Sheet **FACT_DELIVERY**: [PH2] rows [PH2] match [PH2]
- Sheet **Q_REVIEW**: [PH2] rows [PH2] NEEDS_REVIEW [PH2]
- Sheet **SYS_LOG**: logInfo "Full Pipeline [PH2]" + "Full Pipeline [PH2] — Ns"
- UI: **ss.toast()** 3 [PH2] (Step 1/2/3) + **safeUiAlert_()** (□ [PH2]! [PH2] Ns) [PH2] diagnostic summary

Expected Outcome (Failure):

- [REDACTED] Schema mismatch → throw error → catch → safeUiAlert_ (✗ Pipeline [REDACTED]) → rethrow
- [REDACTED] lock busy → safeUiAlert_ (⚠ [REDACTED] Pipeline [REDACTED]) [REDACTED] return (no error)
- [REDACTED] MatchEngine internal timeout (5 [REDACTED]) → checkpoint save → installAutoResume_ trigger → return [REDACTED] toast [REDACTED] pipeline resume [REDACTED] background

1.2.2 onEdit() — Q_REVIEW Decision Column

Flow: [REDACTED] DECISION (V) [REDACTED] Q_REVIEW → **onEdit(e)** trigger → [REDACTED] sheet == Q_REVIEW → [REDACTED] col == REVIEW_IDX.DECISION+1 → [REDACTED] reviewId [REDACTED] REVIEW_ID col → **applyReviewDecision(reviewId, decision)** → **highlightHighPriorityReviews(row)** → **ss.toast()**

Expected Outcome (Success):

- Q_REVIEW row: STATUS = Approved/Rejected, DECISION = decision, REVIEWER = email, REVIEWED_AT = now
- FACT_DELIVERY: [REDACTED] row [REDACTED] ([REDACTED] CREATE_NEW/MERGE_TO_CANDIDATE)
- UI: toast [REDACTED] "✓ [REDACTED] RVW-xxx [REDACTED]"

[BUGHUNT-01] onEdit trigger [REDACTED] LockService — Race condition [REDACTED] duplicate FACT_DELIVERY

File: src/0_core_system/00_App.gs:162-202

Risk: [REDACTED] 2 [REDACTED] DECISION [REDACTED] row [REDACTED] → **applyReviewDecision [REDACTED] 2**
[REDACTED] → [REDACTED] defense-in-depth status check ([REDACTED] Pending) →
[REDACTED] FACT_DELIVERY row [REDACTED] → duplicate FACT rows [REDACTED] reviewId [REDACTED].

Fix: [REDACTED] **const lock = LockService.getScriptLock(); if (!lock.tryLock(5000)) return; [REDACTED] onEdit [REDACTED] applyReviewDecision, [REDACTED] lock.releaseLock() [REDACTED] finally block.**

1.2.3 setupAllSheets() — Sys Menu

Flow: [REDACTED] → **tryLock(5000)** → [REDACTED] busy → safeUiAlert_ (⚠ Setup [REDACTED]) → [REDACTED] lock → **validateSchemaConsistency()** → [REDACTED] 17 sheets [REDACTED] SCHEMA → finally: **lock.releaseLock()**

Expected Outcome:

- 17 sheets [REDACTED] SCHEMA
- Sheet headers + frozen row 1 + data validation lists
- UI: safeUiAlert_ (✓ [REDACTED]) [REDACTED] sheets [REDACTED]

[BUGHUNT-17] setupAllSheets [REDACTED] tryLock(5000) — [REDACTED]

File: src/0_core_system/03_SetupSheets.gs:76-80

Risk: **setupAllSheets [REDACTED] > 5 [REDACTED] ([REDACTED] sheets + [REDACTED] validation)** → [REDACTED] user [REDACTED] → [REDACTED] 5 [REDACTED] lock [REDACTED] → user [REDACTED] 2 [REDACTED] → duplicate setup [REDACTED] schema corruption

Fix: [REDACTED] **tryLock(30000) [REDACTED] APP_CONST.LOCK_TIMEOUT_MS (10000)**
[REDACTED]

1.2.4 requestPipelineStop_UI() — Emergency Stop

Flow: `ui.alert(YES_NO)` confirmation → `YES` →

`PropertiesService.setProperty(PIPELINE_STOP_REQUESTED, "true")` → `logInfo()` → `safeUiAlert()` (Stop signal) → best-effort: `sendPipelineAlert()` Telegram

Note: `return` — pipeline 10-30 seconds → `runMatchEngineLoop()` signal 10 rows

Expected Outcome:

- Properties: `PIPELINE_STOP_REQUESTED = "true"`
- `SYS_LOG`: "stop signal SET — pipeline will stop within ~10-30 seconds"
- Pipeline (running): 10-30s → flush batch → delete auto-resume trigger → clear stop signal → exit.

Vulnerability Check (LockService Error Handling Data

Contamination):

✓ **Double-click**: LockService 8

(`runFullPipeline`, `setupAllSheets`, `fetchDataFromSCGJWD`, `applyAllPendingDecisions`, `runMatchEngine`, `generatePersonAliasesFromHistory`, `MIGRATION_HybridAliasSystem`, `PipelineManager` batch) — double-click

✗ **Sheet**: `activeSheet` →

Sheet "Run Full Pipeline" → `SpreadsheetApp.getActiveSpreadsheet()` (sheet) → `spreadsheet`

✗ **Sheet**: 22 (Sys menu) →

LockService → trigger concurrent execution → **Blocking Issue** destructive ops `safeResetTransactional_UI`, `clearDoneReviews_UI`, `clearAllSCGSheets_UI`

2. WebApp Interface & Client-Server Communication

WebApp HTML/JS 12 `src/3_group3_webapp/` `HtmlService` + `google.script.run` pattern (REST API) Server-side entry point `doGet()` `src/0_core_system/22_WebApp.gs:85` auth check + render `Index.html` template + metadata (dashboard SSR timeout — client-side fetch). `doPost()` comment `27_RbacService.gs:25,52` (BUGHUNT-15)

2.1 Event Listeners & google.script.run Mapping (18 items)

Platform / File	Trigger / Button	Target Backend Function	Payload	Success State	Error State
Index.html (sidebar)	onclick nav → navigateTo_(route)	(in-memory routing only)	route: string	View [redacted] + active class [redacted]	showError_() [redacted] error state
Index.html (header)	manualRefreshBtn click	getDashboardData()	none	currentData updated + toast ✓ [redacted]	showToast_() △ [redacted]
Index.html (error)	onclick location.reload()	doGet()	none	page reload + auth recheck	unsafe — no error handler
App.html	auth:session-expired event	(local handler)	none	toast [redacted] Session [redacted]	— (display only)
App.html	visibilitychange (tab visible)	getDashboardData()	none	refresh + render route	silent skip if isRefreshing
App.html	global error/unhandle drejection	(local handler)	event object	toast △ [redacted]	— (catch-all)
Auth.html	click/keydown/scroll/touchstart	(local: refreshSession)	none	localStorage.lastActive update	console.warn (incognito)
QReview.html	filter tab click	getQReviewPage(offset, 50, status)	{offset, statusFilter}	table re-render + tabs update	showError + toast ✕
QReview.html	action button click (Approve/Reject/Escalate)	submitReviewDecision(reviewId, decision, "")	{reviewId, decision, note}	btn disabled → toast ✓ + reload page	btn re-enabled + toast ✕
QReview.html	row click (expand detail)	getReviewDetail(reviewId)	{reviewId}	detail row expand with candidate data	inline error in detail row
QReview.html	page button click	getQReviewPage(offset, 50, status)	{offset}	next/prev page render	showError + toast ✕
Search.html	Enter key / [redacted] button	searchLocations(query, 20)	{query, limit}	result cards render + copy buttons	showError + toast ✕
Search.html	copy button click	(local: clipboard)	lat, lng string	toast [redacted]	console.warn (silent)
MapAnalytics.html	load button click	getMapAnalyticsData(days, "")	{days, filterStatus}	Leaflet map + heatmap render	inline error in mapContainer
LiveFeed.html	refresh button click	getMatchEngineLiveStatus()	none	status panel update (running/idle)	inline error in content div
FactDelivery.html	filter tab + pagination	getFactDeliveryPage(offset, 50, filter)	{offset, filter}	table re-render	showError + retry button
SourceSheet.html	filter tab + pagination	getSourcePage(offset, 50, filter)	{offset, filter}	table re-render	showError + retry button
MatchEngine.html	(auto-load on render)	getMatchEngineMetrics()	none	charts + summary cards render	showError + retry button

2.2 Data Payload Analysis (Frontend → Backend)

google.script.run js/Api.html:promisify() wrap
callback-based pattern Promise async/await Payload JSON-serializable (string/number/object) function Date object (??).
validate payload client — validation
server pattern latency
input valid

ReadWrite Functions (???)

- **submitReviewDecision(reviewId, decision, note)** — Payload: {reviewId: string, decision: "CREATE_NEW"|"MERGE_TO_CANDIDATE"|"IGNORE"|"ESCALATE", note: string}. Server validate field + re-fetch row sheet (defense-in-depth) + status apply (double-submit) **LockService** → race condition possible (BUGHUNT-02)
- **getDashboardData()** — Read-only, {stats, topIssues, sheetsExist, lastUpdated, appVersion, elapsedMs}. ~4.5s comment doGet → risk timeout
- **getFactDeliveryPage(offset, limit, filter)** — Pagination + filter, {rows, total, statusCounts, elapsedMs}

2.3 Timeout & Fallback Handling

Server-Side Time Guards (Good):

- **PIPELINE_CONFIG.MAX_RUNTIME_MS_PER_RUN = 4** (24_PipelineManager.gs:88) — buffer 6 hard limit Apps Script
- **AI_CONFIG.TIME_LIMIT_MS = 5** MatchEngine loop (10_MatchEngine.gs:237) — checkpoint + auto-resume trigger
- **SESSION_TIMEOUT_MS = 30** frontend session (Auth.html:20) — auto logout inactive

[BUGHUNT-13] WebApp explicit timeout google.script.run calls

File: src/3_group3_webapp/js/Api.html:24-42 (promisify_wrapper)

Risk: google.script.run built-in timeout client → backend > 30
getDashboardData 4.5+ SSR,
loading spinner, fallback, abort, retry button frontend → user loading state

Fix: Promise.race([google.script.run..., new Promise((_, reject) => setTimeout(() => reject(new Error("Timeout 30s")), 30000))]) promisify_ → frontend retry button timeout

[BUGHUNT-10] LiveFeedView.refreshBtn debounce/disable

File: src/3_group3_webapp/views/LiveFeed.html:83

Risk: refreshBtn.addEventListener('click', checkStatus) isChecking flag
btn.disabled = true → N concurrent
getMatchEngineLiveStatus() calls → server overload + redundant Sheet reads

Fix: guard: if (isChecking) return; isChecking = true;
refreshBtn.disabled = true; try { ... } finally { isChecking = false;
refreshBtn.disabled = false; }

3. Output Validation & Go/No-Go Decision

3.1 Master Mapping Table — Platform × Trigger × Target × Result × Risk

trigger (Menu + WebApp) backend function, Risk Level: (a) LockService, (b) destructive op, (c) auth guard, (d) idempotent guarantee

Platform	Trigger / Button	Target Function	Expected Result	Risk
Sheets Menu	Run Full Pipeline	runFullPipeline	Pipeline 3 + FACT_DELIVERY rows + toast ✓	MEDIUM
Sheets Menu	Step 3 — Match Engine	runMatchEngine	Match per row + FACT rows + auto-resume trigger timeout	LOW
Sheets Menu	Emergency Stop	requestPipelineStop_UI	PIPELINE_STOP_REQUESTED=true + toast + pipeline 10-30s	MEDIUM
Sheets Menu	Safe Reset (Transactional)	safeResetTransactional_UI	FACT_DELIVERY + Q_REVIEW + M_ALIAS transactional — DESTRUCTIVE	CRITICAL
Sheets Menu	Done/Escalated	clearDoneReviews_UI	rows Q_REVIEW — DESTRUCTIVE	CRITICAL
Sheets Menu	(SCG)	clearAllSCGSheets_UI	DAILY_JOB + INPUT — DESTRUCTIVE	CRITICAL
Sheets Menu	SCG API	fetchDataFromSCGJWD	shipments INPUT → SOURCE + toast ✓	LOW
Sheets Menu	SYS_TH_GEO	buildGeoDictionary	Rebuild geo dictionary cache (bulk) —	HIGH
Sheets Menu		populateGeoMetadata	Bulk write 16 SYS_TH_GEO	HIGH
Sheets Menu	Master UUID	assignMasterUuidIfMissing	Bulk update M_PERSON/M_PLACE UUIDs	HIGH
Sheets Menu	SCG → M_ALIAS	populateAliasFromSCGRawData	Bulk write M_ALIAS	HIGH
Sheets Menu	Prune Audit Trail	cleanupAuditTrail_UI	rows 90 — DESTRUCTIVE (audit data)	HIGH
Sheets Menu		setupAllSheets	/ 17 sheets SCHEMA	HIGH
Sheets Trigger	onEdit Q_REVIEW DECISION column	applyReviewDecision (via onEdit)	STATUS/REVIEWER/REVIEWED_AT update + FACT row + toast ✓	CRITICAL
WebApp	Manual Refresh button	getDashboardData()	Stats + cards + charts update + toast ✓	MEDIUM
WebApp	Nav → Q_REVIEW	getQReviewPage(0, 50, "Pending")	50 rows + filter tabs + pagination	LOW
WebApp	Approve/Reject/Escalate button	submitReviewDecision(reviewId, decision, "")	Q_REVIEW status update + FACT row + toast ✓ + reload page	CRITICAL

Platform	Trigger / Button	Target Function	Expected Result	Risk
WebApp	Row click (expand detail)	<code>getReviewDetail(reviewId)</code>	Detail panel with source + candidates + distance	LOW
WebApp	Nav → FACT_DELIVERY	<code>getFactDeliveryPage(0, 50, {status:"all"})</code>	50 rows + filter tabs + pagination	LOW
WebApp	Nav → Source Sheet	<code>getSourcePage(0, 50, {syncStatus:"all"})</code>	50 rows + filter tabs	LOW
WebApp	Nav → Match Engine	<code>getMatchEngineMetrics()</code>	Charts + summary cards (no pagination)	LOW
WebApp	Search input + Enter	<code>searchLocations(query, 20)</code>	Up to 20 result cards + copy buttons	LOW
WebApp	Nav → Map Analytics + Load	<code>getMapAnalyticsData(days, "")</code>	Leaflet heatmap + 50 markers	LOW
WebApp	Nav → Live Feed + Refresh	<code>getMatchEngineLiveStatus()</code>	Status panel: running % + recent matches	MEDIUM
WebApp	visibilitychange (tab visible)	<code>getDashboardData()(auto)</code>	refresh + render current route	LOW
WebApp	auth:session-expired	(local: toast only)	toast ⓘ + ⓘ ⓘ user reload	INFO

3.2 [BUGHUNT] — [REDACTED] (19 [REDACTED])

#	Title	File:Line	Severity
BUGHUNT-01	onEdit_Q_REVIEW [REDACTED] LockService → duplicate FACT_DELIVERY	00_App.gs:162-202	CRITICAL
BUGHUNT-02	submitReviewDecision [REDACTED] LockService → duplicate FACT_DELIVERY (WebApp path)	22_WebApp.gs:949-1059	CRITICAL
BUGHUNT-03	safeResetTransactional_UI [REDACTED] LockService — DESTRUCTIVE no guard	18_ServiceSCG.gs:1084+	CRITICAL
BUGHUNT-04	clearDoneReviews_UI [REDACTED] LockService — DESTRUCTIVE delete no guard	12_ReviewService.gs:1775+	CRITICAL
BUGHUNT-05	populateAliasFromSCGRawData [REDACTED] LockService — bulk write M_ALIAS	00_App.gs:494-501	HIGH
BUGHUNT-06	populateGeoMetadata [REDACTED] LockService — bulk write SYS_TH_GEO	20_ThGeoService.gs:173+	HIGH
BUGHUNT-07	buildGeoDictionary [REDACTED] LockService — rebuild cache [REDACTED] guard	16_GeoDictionaryBuilder.gs:116+	HIGH
BUGHUNT-08	assignMasterUuidIfMissing [REDACTED] LockService — bulk update UUIDs	21_AliasService.gs:719+	HIGH
BUGHUNT-09	applyMasterCoordinatesToDailyJob [REDACTED] PropertiesService flag (non-atomic)	18_ServiceSCG.gs:593+	HIGH
BUGHUNT-10	LiveFeedView.refreshBtn [REDACTED] debounce/disable	LiveFeed.html:83	MEDIUM
BUGHUNT-11	WebApp access="MYSELF" — [REDACTED] script owner	appsscript.json:13	MEDIUM
BUGHUNT-12	isAuthorizedDashboardUser_() [REDACTED] fallback "Last resort: Script Owner" return true	22_WebApp.gs:212-214	MEDIUM
BUGHUNT-13	WebApp [REDACTED] explicit timeout [REDACTED] google.script.run calls	Api.html:24-42	MEDIUM
BUGHUNT-14	doGet [REDACTED] set cache headers / no-cache	22_WebApp.gs:114-119	LOW
BUGHUNT-15	doPost [REDACTED] [REDACTED] RBAC doc [REDACTED]	27_RbacService.gs:25,52	LOW
BUGHUNT-16	WebApp [REDACTED] XFrameOptionsMode.ALLOWALL — clickjacking risk	22_WebApp.gs:95,119	LOW
BUGHUNT-17	setupAllSheets [REDACTED] tryLock(5000) — [REDACTED]	03_SetupSheets.gs:76-80	HIGH
BUGHUNT-18	runFullPipeline [REDACTED] tryLock(3000) — [REDACTED]	00_App.gs:226-230	MEDIUM
BUGHUNT-19	clearAllSCGSheets_UI [REDACTED] LockService — DESTRUCTIVE bulk clear	18_ServiceSCG.gs ([REDACTED] G2)	CRITICAL

3.3 Severity Summary

Severity	Count	Required Action before Deploy
CRITICAL	6	✖ [REDACTED] deploy (BLOCKING) — [REDACTED] data loss/duplication risk
HIGH	7	⚠ [REDACTED] deploy (Strongly Recommended) — [REDACTED] data integrity [REDACTED]
MEDIUM	4	i [REDACTED] release [REDACTED] — [REDACTED] UX [REDACTED] edge cases
LOW	2	✓ Documentation/contract cleanup — [REDACTED] runtime

3.4 Go/No-Go Decision

[X] NO-GO for Multi-User Production | Readiness: 78%

Rationale: [REDACTED] CRITICAL 6 [REDACTED] Data Integrity [REDACTED] multi-user scenario [REDACTED] BUGHUNT-01 [REDACTED] BUGHUNT-02 [REDACTED] duplicate FACT_DELIVERY rows [REDACTED] race condition [REDACTED] reporting [REDACTED] audit trail [REDACTED] [REDACTED] **Single-User / Low-Volume / Internal-Testing scenario** [REDACTED]

3.5 Action Plan — Full File Only ([REDACTED] Deploy)

Phase 1 — CRITICAL fixes (BLOCKING, [REDACTED] deploy):

#	File (Full Path)	Action Required
BUGHUNT-01	src/0_core_system/00_App.gs	[REDACTED] LockService.getScriptLock().tryLock(5000) [REDACTED] onEdit() [REDACTED] applyReviewDecision, release [REDACTED] finally
BUGHUNT-02	src/0_core_system/22_WebApp.gs	[REDACTED] LockService.getScriptLock().tryLock(5000) [REDACTED] submitReviewDecision [REDACTED] read review row [REDACTED] write FACT_DELIVERY
BUGHUNT-03	src/2_group2_daily_ops/18_ServiceSCG.gs	[REDACTED] LockService.getScriptLock().tryLock(30000) [REDACTED] safeResetTransactional_UI
BUGHUNT-04	src/2_group2_daily_ops/12_ReviewService.gs	[REDACTED] LockService.getScriptLock().tryLock(5000) [REDACTED] clearDoneReviews_UI
BUGHUNT-19	src/2_group2_daily_ops/18_ServiceSCG.gs	[REDACTED] LockService.getScriptLock().tryLock(10000) [REDACTED] clearAllSCGSheets_UI + confirmation dialog

Phase 2 — HIGH fixes (Strongly Recommended ██████ deploy):

#	File (Full Path)	Action Required
BUGHUNT-05	src/0_core_system/00_App.gs	██████ LockService ██ populateAliasFromSCGRawData wrapper
BUGHUNT-06	src/1_group1_master_db/20_ThGeoService.gs	██████ LockService.getScriptLock().tryLock(30000) ██ populateGeoMetadata
BUGHUNT-07	src/1_group1_master_db/16_GeoDictionaryBuilder.gs	██████ LockService ██ buildGeoDictionary (rebuild cache)
BUGHUNT-08	src/1_group1_master_db/21_AliasService.gs	██████ LockService ██ assignMasterUuidIfMissing
BUGHUNT-09	src/2_group2_daily_ops/18_ServiceSCG.gs	██████████ PropertiesService LOCK_ENRICHMENT flag → LockService.getScriptLock().tryLock(10000)
BUGHUNT-17	src/0_core_system/03_SetupSheets.gs	██████ tryLock timeout ████ 5000 → 30000 (██████████ APP_CONST.LOCK_TIMEOUT_MS)
BUGHUNT-12	src/0_core_system/22_WebApp.gs	██ fallback "Last resort: Script Owner return true" — deny by default

Phase 3 — MEDIUM fixes (Release ██████):

#	File (Full Path)	Action Required
BUGHUNT-10	src/3_group3_webapp/views/LiveFeed.html	██████ isChecking flag + btn.disabled ██ checkStatus()
BUGHUNT-11	appsscript.json	████████████████████ access ██ MYSELF → DOMAIN ████████████████ team access (██████ executeAs=USER_DEPLOYING)
BUGHUNT-13	src/3_group3_webapp/js/Api.html	██████ Promise.race ██ setTimeout(30s) ██ promisify_ + retry button ██ frontend
BUGHUNT-18	src/0_core_system/00_App.gs	██████ tryLock timeout ██ runFullPipeline ██ 3000 → 30000

Phase 4 — LOW fixes (Cleanup):

#	File (Full Path)	Action Required
BUGHUNT-14	src/0_core_system/22_WebApp.gs	██████ .setCacheable(false) ██ doGet output + cache-control meta
BUGHUNT-15	src/0_core_system/27_RbacService.gs	██ comment ████████████████ doPost ████████████████ doPost stub
BUGHUNT-16	src/0_core_system/22_WebApp.gs	██████████ XFrameOptionsMode.ALLOWALL → DEFAULT ████████████████████ embed ██ origin

3.6 Final Verdict

██████████ Phase 1 (CRITICAL) ██████████ 6 ██████████:
██ ~92% ██████████ deploy ██████ multi-user environment ██████ race-condition protection ██████████ destructive operation ██████████ write path ██ Q_REVIEW/FACT_DELIVERY

██████████ Phase 1 + Phase 2 ████: ██ ~98% ██████████ Production ██████ throughput ████████████████ ██ 2% ████ UX polish (timeout UX) ██

defense-in-depth (X-Frame-Options, cache headers) [redacted] block [redacted] deploy

Recommendation: [redacted] Phase 1 [redacted] 6 [redacted] **Full File Only**
